retro

REPLACEMENT LED POOL LIGHT

The Retro R10 is a universal 10" vinyl replacement pool light designed to retro-fit all major brand 10" niches and pool controllers. Exclusive to Fox, this model is available in both white and gray with

Adapter Plates to protect your Customer's vinyl liner.

The Retro R10 provides options for easy installation, offers advanced cooling technology, and is engineered with industry leading technology for a brighter and more efficient lifetime in pools and spas. *Retro R10 is backed by a 3 year warranty.*

R10VL12R1GMP - RETRO GREY RIMMED 10" MULTI PLUS LED POOL LIGHT + ADAPTER PLATE (VINYL)

R10VL12R1WMP - RETRO WHITE RIMMED 10" MULTI PLUS LED POOL LIGHT + ADAPTER PLATE (VINYL)

The Retro R10's external heat sink design pushes the boundaries of thermal technology to harness the full cooling potential of the pool. Combine this with Spa Electrics award winning Ceramic Light Engine technology, it makes the Retro R10 light the brightest on the market.

Created with durability and longevity of a pool lifetime in mind, the Retro R10 was created with innovative circuit design and German-engineered LEDs to deliver the industry's highest output, and longest lasting light.

SIMPLE INSTALLATION

STANDARD INSTALLATION

If existing niche mounting hooks & screws are intact, Retro R10 supports can be installed via the Hook Tab at the base and front facing screw at the top. The Hook Tab adjusts to suit all major brand niche tabs without the need for extra washers & spacers.

CAM-LOCK INSTALLATION

The Retro R10's Universal Adapter is capable of gripping the niche wall without mounting hooks or screws for installation. The patented Cam-Locks grip the niche wall, and pull the light & niche together for a secure fit.

QUICK-CONNECT PLUG

Gone are the days of pulling cables through conduit. With the Retro R10's Quick Connect plug, retro-fit installation is fast and reliable. The UL Listed Quick Connect Plug system attaches directly to the existing cable in the niche, saving time & money, and allowing for light replacement when cables cannot be removed.

POWER CORDS

Should existing light cords be unusable from normal wear and tear or damage, 100' & 150' replacement cords are available with a connector to attach to the Retro R10.

(R1012AWG100US) - 100' POWER CORD
(R1012AWG150US) - 150' POWER CORD

The Quick Connect Plug power offers safe low voltage connection for pool users, and enables easier future servicing in the field.

LOW VOLTAGE TRANSFORMER 50 WATTS

Featuring a host of innovative features, the LVX Series Transformer will simplify installation while providing your Customers with quality, long-lasting power supply for their underwater lighting systems. In addition to the listed features below, the LVX Series is equipped with multiple knockouts and an innovative case design that allows the unit to be installed in multiple orientations. This minimizes the view of unsightly conduit, and ensures a clean and professional installation every time. *LVX Transformer is backed by a 3 year warranty.*

(LVX50) LOW VOLTAGE TRANSFORMER 50 WATTS

QUICK CONNECT

Complete the installation with confidence, using the latest Quick-Connect termination blocks supplied for primary and secondary connections.

HIGH-QUALITY COIL

With greater efficiency and power stability than an EI coil, this high quality Toroidal coil transformer consumes less energy and lasts longer than traditional transformers.

WATER TIGHT GUARANTEE

The LVX series uses the same sealing technology as the underwater lights.

With an IP55 waterproof rating, it guarantees essentially no moisture issues once installed.
