

VINYL LINER SELECTIONS 2024

WHY VINYL?

To start, pool customization is our specialty, and our vinyl liners are no exception. Fox Pool vinyl liners are handcrafted to fit the exact size specifications of any new or existing inground pool. Our variety of liner patterns provide you the power to choose what best suits your style and matches your landscape. With all of the decisions you've had to make on your pool thus far, pattern selection should be the most fun! Consider some tips from our vinyl experts to help make your pattern decision easy and enjoyable:

ABOVE ALL - TILE: Quite literally, the 'tile' on the vinyl liner patterns sits above the waterline and will be something most pool visitors notice first. Take note that some patterns have a more structured, geometric appeal to them. As a repeating pattern, this will appear uniformed and add a sophisticated elegance against the free-flowing water in the pool. In contrast, tiles with more curvature and less geometric rigidity provide more organic movement for the eye when viewing the tile in or out of the pool. Full print patterns are also available for a consistent appearance throughout the pool from top to bottom.

COLOR: Covering majority of the pool is the floor color, which visually dominates how your pool appears amongst the rest of the backyard. As water reflects the sky, this has a certain effect on the way different colors and shades of colors appear to the eye. Neutral floors such as tans and grays portray a more natural vibe to the pool (like stepping into a shallow sandy ocean). Different shades of blue are most popular, and should be chosen based on the tone and vibrancy you envision. *We can help with this!*

VINYL THATS TRUE TO YOU: Above all, this is YOUR pool. Choose the pattern that catches your eye, matches your personal style, and fits the aesthetic of your backyard landscape. YOU choose your pool's personality!

VINYL BENEFITS

- Fox liners are made to exact specifications and are custom made to fit your pool
- Ultraviolet inhibitors and anti-bacterial agents help ensure long life.
- The look of tile with no tiles to replace or grout to clean.
- Sleek and elegant finish over steel steps, benches and sundecks
- Smooth vinyl surface will not cause scratches or abrasions like concrete.
- 25 year limited warranty - see Fox Dealer for details.
- Gray bead can be requested for Designer Gray pools.

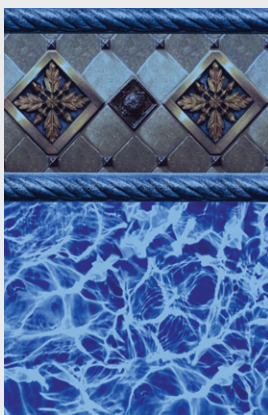

A unique, meticulous process where handcrafted care meets precise technology in unison to carefully create a perfectly custom liner for any pool. Our Vinyl Liner Shop is every bit as impressive as it sounds, using the latest technology to produce large volumes of vinyl liners every day.

Once a liner is chosen and proper pool size and specifications are provided, our team uses Automated Cutters to extract liner for pieces of the pool. An Air Welder or Radio Frequency Welding is then used to weld the pieces of vinyl together, creating a bond stronger than the vinyl itself.

Once a liner is in its complete form, quality inspection is performed by our highly-skilled and detail-oriented team. The liner is blown-up to mimic an inflated parachute, and inspection takes place underneath from our team by quite literally, getting on their hands and knees to inspect and feel for any holes, cuts, tears, or imperfections. Quality and care for the process lend well to seamless installation for a beautiful liner with the perfect fit for your pool, every time.
